Art Unit: 2856

Allowable Subject Matter

Claims 1, 3-20 are allowed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Gott (US Patent 6,175,310) teaches leak detector with testing portion long axis extending in a different direction from another portion as shown in figure 2D. However, the testing portion does not extend in a different direction "than the long axis of [a] handle" as in the instant invention.

Seiger (US Patent 2,127,538) teaches testing portion extending in a different direction from the long axis of handle 16 as shown in the figures. However, the different direction is on a short axis. The long axis of the test portion is in line with the long axis of the handle.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles D. Garber whose telephone number is (571) 272-2194. The examiner can normally be reached on 6:30 a.m. to 3:00 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hezron Williams can be reached on (571) 272-2208. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
